

Selectable Text Reliability Fixture

paper-float-selection-baseline-v1

Gesture baseline

Reliable selection should support mouse dragging, double-clicked words, triple-clicked paragraphs, Shift-extended ranges, and keyboard selections.

First repeated location

The same selection appears here.

Long selection

A newer selection must invalidate every delayed read and translation created for an older selection. Closing the popup must also prevent stale work from making the window visible again. This paragraph exercises wrapping, popup resizing, and scrolling without relying on network-generated content.

Second repeated location

The same selection appears here.

PDF extraction boundary

The proposed method keeps state-of-the-art terminology intact.
